design-made educational and work furnitures_

english version_

motris_

[mo-tris] *noun*

Inspired by the words **move** (movement) and **tetris** (the game). Synthesis of our idea of design in movement: fluid, concrete, dynamic.

Motris is the innovative brand born from the experience of Wacebo Europe Srl in the educational market. We are active in the B2B sector of the schoolplace from Consultancy & Design services (organizational consultancy, space planning, schoolplace change management) to creation and realization of Innovative Learning Environments.

Technology evolves and, hand in hand, even the educational methodologies are adapting to change. In this process of evolution, even the furniture "adapts to change": countless teaching methods need dynamic environments, spaces capable of modify your setting according to the different educational moments.

next gen learning

g environments_

The new training approach, enriched by digital technologies, requires the creation of conditions to completely review the distribution of dedicated physical spaces for teaching, making the space an "operating environment of ideal learning" linked to a different and flexible distribution of workstations.

The revolution of spaces, however, does not concern only the "class" space, but all the spaces of a building, creating a real Open Learning Environment, where understairs, corridors, indoor spaces are involved in the transformation from a simple building to a social entity.

Furnishing, mobile and modular solutions, thought and made to alternate the classic frontal teaching to the «inverted lesson», the work of group and in pairs research, the debate in the laboratory teaching, all in a single environment, where the student becomes the central subject of learning.

The didactic spaces that identify themselves with the new classes need to be rethought and designed to encourage and facilitate the sharing of knowledge, research, reflection and collaboration.

school changing_

Dynamic spaces, even without a teacher desk, in which the classic frontal lesson becomes just a moment or a short part of the didactic action, while ample space is left to collaborative communication process: group activities, research, brainstorming, reworking and presentation where students become active subjects of their own training and the teacher assumes the role of moderator and learning facilitator.

The Space, understood as a “physical and material container where teaching takes place” is an element not to be overlooked: it is important to choose the setting of workstations according to the type of teaching you want to implement.

closet collection_

everything find its place

Order is the key word and the essential element to work at your best: being able to count on closets and bookcases where you can store your things is essential to eliminate unnecessary waste of time and focus exclusively on what needs to be done.

Whether they are exposed shelves or colored doors, the Closet Collection makes every study or work environment lively and welcoming at the same time.

the future is furniture_

Structure panels

18 mm melamine wood particles, 0.4 mm melamine edge available in 3 colors: white, silver and charcoal grey.

Base

4 black nylon feet with height adjustment range of 15 mm.

Shelves

25 mm melamine wood particles, 0.4 mm melamine edge in the same color as the surface, available in 3 colors: white, silver and charcoal grey. Concealed metalware.

Certifications

- UNI EN 14073-2
- UNI EN 14073-3
- UNI EN 14074
- UNI 8601
- UNI 8606
- CAM

Doors

18 mm melamine wood particles, melamine edge 0.4 mm, available in 7 colors: white, silver, charcoal grey, blue, yellow, red and green. 2 mm ABS perimeter edges in the same color as the surface.

Hinges

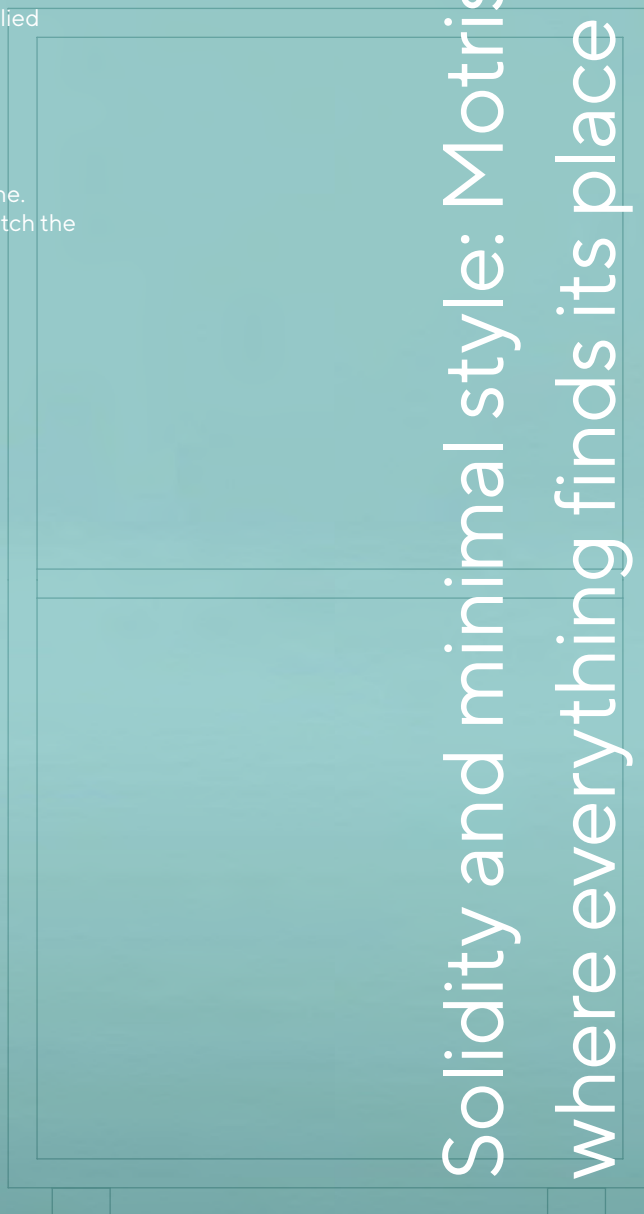

Metal wing with 110 ° opening, complete with bases, with 3D adjustment.

Lock

With extractable cylinder supplied with double foldable accident prevention key

Handle

"Bridge" shape, 64 mm centre distance, made of polypropylene. Supplied in a solid colour to match the color of the doors.

Solidity and minimal style: Motris closets line, where everything finds its place in an orderly way.

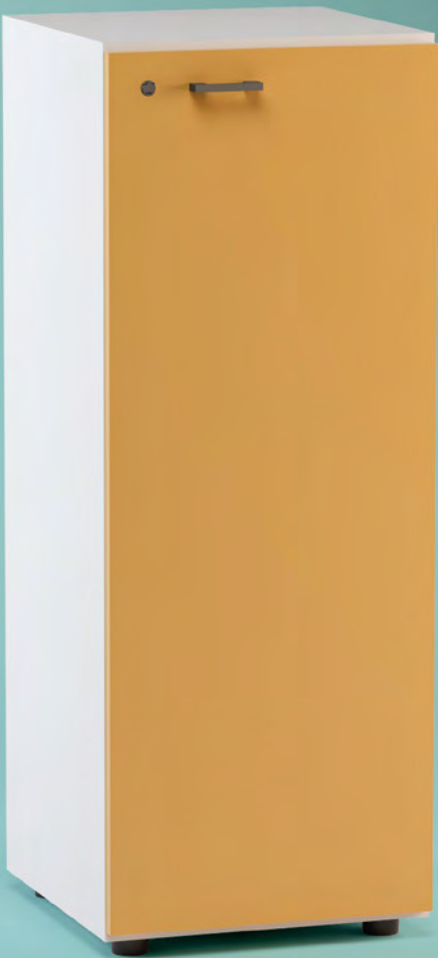

overview__

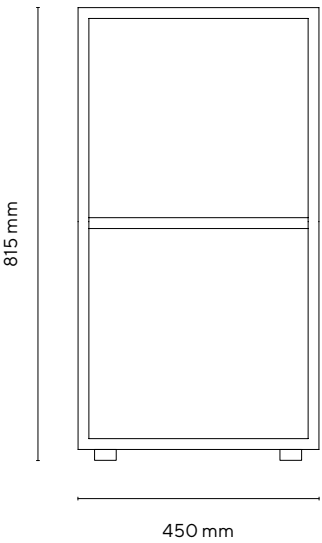

All components are supplied disassembled and packaged in a triple foldable cardboard box, with perimeter protection strips and filling.

Corners are protected, where necessary, with shockproof protectors. The packaging is closed by means of adhesive tape and heat-sealed nylon strap.

not ordinary comfort

Furnish your rooms with style without sacrificing comfort: Motris lounge collection offers a range of pouf and lounge seats, in perfect balance between design and comfort. Welcome to the 'next comfort experience'.

the future is furniture_

PSRT40SPNI_

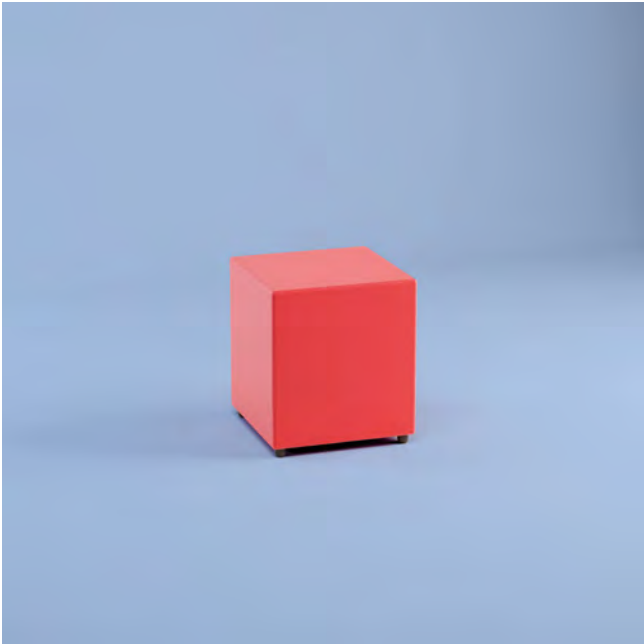

Soft square seat, internal load-bearing structure in particle board panel with low formaldehyde emission (Class E1) with fixed black PVC feet.

Polyurethane foam padding high density thickness. 10 mm (optionally fireproof CAT 1IM), leatherette upholstery (optionally Class 1 fireproof) available in six colors.

Combined with other elements, it allows infinite seating configurations with side continuity.

All fittings are designed for correct use and with a high degree of strength.

Accessories are designed to ensure the safety of the pupils and prevent the manipulation by children.

tribune seat and pouf

debate collection_

DBTR4P130_

Tribune composed of base, seat surfaces, partition sides and doors in 18 mm melamine chipboard panels with color edging around the perimeter with 2 mm thick abs edge, available in three colors.

Eco-leather cushions available in six colors.

Welded frame in pickled steel tube 20 x 20 x 1.5 mm painted with electrostatic epoxy-polyester resin powders, joined to the panels by means of barrel tie rods and M6 screws, available in seven colors.

Swivel castors with brake Ø 60 mm die-cast metal support painted grey, rotating part in thermoplastic rubber, payload 50 kg/wheel, n. wheels 10, total payload 500 kg

Side open compartments each can be equipped with 1 white plastic container h 200 mm or 2 plastic containers h 100 mm, both removable by metal runners.

Double rear compartment with flap/desk doors, 3 arm hinges and 2 pistons per door.

Recessed plastic handle available in two colors.

In correspondence with the seats, there is an adhesive mat in non-slip material on which to lay 40 mm thick eco-leather cushions secured to the structure thanks to velcro strips available in four colors.

Protection tubes behind the upper seats in pickled steel Ø 22 mm painted with electrostatic epoxy-polyester resin powders, joined to the structure with M6 screws and nuts (8 for each protection).
